

## Statement of Qualifications – Project Profiles

**Project:** Standards of Disclosure for Mineral Projects, National Instrument 43-101 Feasibility Study Report for Uranium Development Companies

**Services Provided:** Standards of Disclosure for Mineral Projects, financial feasibility estimates

TREC personnel prepared Preliminary Assessments, Pre-Feasibility Studies and Feasibility Studies for various uranium development client's.

The projects included numerous wellfields, central uranium processing plant and a satellite plants. The work included review of existing resource quantification reports, developing first principle cost estimates for construction of the wellfields, central uranium processing plant and satellite plant(s). The work also included developing preliminary designs for the processing plants and wellfields. The summary reports provided all cost estimates, cash flow, internal rate of return, net present value at various discount rates and sensitivity analyses for changes in commodity prices, and capital and operating costs.

### SERVICES PROVIDED:

- Resource estimate evaluation and revenue projections
