

Statement of Qualifications – Project Profiles

Project:

Legal Support

A large percentage of TREC's experience includes providing technical consulting and support to our clients' legal counsel and senior management. This work typically includes liability quantification, evaluation of various compliance scenarios, development of technical arguments and/or responses to regulatory agency notices or legal orders and divestiture/acquisition evaluations.

The following is a list of projects that TREC has provided technical support to legal counsel and/or senior management:
